

Overview

At the foundation of our school culinary service is the personalization that we offer to each school that we work with. Our program has culinary artists from our family business crafting each freshly made meal for our students to enjoy. As we have a hands on approach, we take care of all aspects of our culinary services from mindfully sourcing ingredients, creating menus, and taking orders to making and distributing our hand crafted meals. Our service allows schools to focus their energy on education rather than running a school lunch program. All of our culinary offerings are made from locally sourced ingredients, are peanut free and are nutritious meals that kids love to eat. In addition to providing an exciting culinary experience to our students, we also offer this experience to the faculty, staff and community members of the schools we work with. Our services are offered for fundraisers, school events and faculty meetings. We are dedicated to feeding and supporting the communities that we work within.
